## Message from the Adoption Council of Canada

Children and youth in or from the child welfare system often identify the importance of finding stable, caring and nurturing lifelong connections. That is why the Adoption Council of Canada is committed to working together with the Ottawa community to improve the outcomes for children and youth in or from Ontario's child welfare system.

The Adoption Council of Canada has launched a Call to Action to ensure children and youth, and those that work to support them, have access to the appropriate services needed in order to create more opportunities that lead to permanent connections and if possible, family.

Here are a few free, simple ways that you can help.

## Call to Action

1. **Write, call or meet with your MPP about funding kinship services in the child welfare system.** Funding for kinship services will support family members caring for children and youth and prevent them from coming into foster/group homes.  
To find your MPP's contact information, visit: [https://lop.parl.ca/sites/ParlInfo/default/en\\_CA/](https://lop.parl.ca/sites/ParlInfo/default/en_CA/)
2. **Consider fostering.** Open your home to children and youth that enter or stay in care. Foster parents help children and youth develop in a nurturing and stable environment. Family-based care is the best option for at-risk children and youth.  
If would like to know more about how to foster, call: 613-747-7800 or visit <https://goo.gl/OGP0ox>
3. **Write, call or meet with your local MPP about increasing the percentage of child welfare funding devoted to permanency: adoption, legal guardianship, customary care or kinship care.** Children's Aid Societies need more dollars earmarked for permanency.  
To find contact information for your MPP, visit: [https://lop.parl.ca/sites/ParlInfo/default/en\\_CA/](https://lop.parl.ca/sites/ParlInfo/default/en_CA/)
4. **Consider adopting from your local Children's Aid Society** to create a stable, lifelong connection for a child or teenager.
